<b>south end</b>					
A - L = 1 full game each (game is about 6 frames)					

Average number of frames in a normal game is about 6. Assign team players a "letter" - captain pick or randomly. Where a game is "split" - play the first player 3 frames, then play the other player the remainder of that game.

All players will end up playing approximately equal number of games (rounded to half games). Remember which players played "more" frames this week and then play them "less" the following week = fairness!
